CNC2-Spindle 2-Turret Precision Lathe

XW-130M

XW-130 Launched with Long-awaited Live Tool Specifications

Zero Work-in-Progress Inventory with Front/Back Combined Cutting

- Live tool units suitable for use with an 8-inch chuck are available. Up to 20 live tools can be mounted, satisfying requirements for process integration through complex machining.

Original Vibration Damping Construction Adopted

- This machine incorporates original functional materials in the head / loader stand section and has been given a construction that dampens vibration. (Patent pending)

Reassuring Stability for Mass Production

- To restrict changes over time and achieve stable dimensional accuracy in spite of changes in the conditions of use, this machine has an original headstock base cooling mechanism that takes the coolant flow into consideration built into it. (Patent pending)

Reduced Setup Load

- The machine is designed to allow work to be done in a comfortable posture, with an easy-to-use swiveling operation panel, a portable handy teaching terminal for the loader, a restricted spindle center height of 1,000 mm and improved access to the spindle chuck and workpiece turnover unit.
